

# New Universal Mounting Adapter

Quick and easy mounting...

...fits on every car!

## New Features:

- Only one adapter
- Less parts
- Easy storage
- Ergonomic design

# UMA 2015

for all MAD Brake Disc Aligners

## Universal Mounting Adapter

The new MAD UMA 2015 mounting adapter offers you more convenience, coverage and time saving as a result of its use.

### How does the mounting adapter work?

The new green coloured UMA is mounted with two brackets on the caliper ears of the car. The brackets are specifically designed for mounting on the caliper ears with or without thread. For rapid mounting, the UMA brackets have special inserts to match all bolt diameters threaded and none threaded.

After fitting the mounting adapter, the On The Car Lathe is fitted on the sliding piece. The sliding piece assures an accurate lateral centering between the disc aligner and the brake disc.

The green UMA 2015 replaces almost all dedicated adapters (QMP), USM's and universal red and blue mounting plates. Shims are no longer needed.

Much easier, much Quicker!
